

Errata Addendum to the 2020 NFIRS Public Data Release - 02/28/2022

Updated – 3/30/2023

This errata addendum applies to the fire/hazmat and full, all-incident PDR files.

- 1.) On the basic incident file, there is one confined fire incident with a reported civilian fire death. By definition, confined fires should not have reported fire deaths. This incident is under review by the fire department. Due to data reporting errors, the following incident should be excluded from all fire data analyses:

INCIDENT_KEY	INC_TYPE	AID	PROP_USE	OTH_DEATH
GA_10304_10022020_20024_0	113	2	400	1

- 2.) There are 15 fire incidents on the basic incident file that do not have a fire or wildland fire module. These incidents should be excluded from all fire data analyses.

- 4.) There are incidents where the first 8 characters of ALARM do not always match INC_DATE. Both the NFIRS Complete Reference Guide and the Design Documentation indicate that the INC_DATE and the date portion of ALARM are supposed to be the same (except that ALARM can be one day later than INC_DATE if the incident is an exposure).

If you have any concerns or questions about the above information, please contact the following:

NFIRS Support Center

Hours of Operation - Monday through Friday from 8 a.m. – 4:30 p.m. Eastern time.

Call 888-382-3827 or email FEMA-NFIRSHelp@fema.dhs.gov.
