

FEMA Authorizes Funds to Fight Utah's Ether Hollow Fire

Release Date: septiembre 8, 2020

DENVER – This evening, FEMA authorized the use of federal funds to help with firefighting costs for the Ether Hollow Fire burning in Utah County, Utah.

FEMA Regional Administrator Lee dePalo approved the state's request for a federal Fire Management Assistance Grant (FMAG) after receiving the request and determining that the fire threatened such destruction as would constitute a major disaster.

At the time of the request, the Ether Hollow Fire was threatening 500 primary homes in the Hobble Creek Community, which 150 were evacuated. The fire is also threatening a community center, communication towers, phone lines, a watershed, and irrigation and flood control resources in the area. Mandatory evacuations are taking place for approximately 500 people. The fire started on September 7, 2020, and has burned in excess of 1,000 acres of state, federal and private land.

The authorization makes FEMA funding available to pay 75 percent of the state's eligible firefighting costs under an approved grant for managing, mitigating and controlling designated fires. These grants do not provide assistance to individual home or business owners and do not cover other infrastructure damage caused by the fire.

Fire Management Assistance Grants are provided through the President's Disaster Relief Fund and are made available by FEMA to assist in fighting fires that threaten to cause a major disaster. Eligible items can include expenses for field camps; equipment use, repair and replacement; mobilization and demobilization activities; and tools, materials and supplies.

With the FMAG authorization, additional funding is made available through the Hazard Mitigation Grant Program (HMGP) Post Fire for the mitigation of wildfire and related hazards, such as flood after fire or erosion. Some eligible wildfire
