

FEMA to Evaluate Readiness of the State of Maryland

Release Date: septiembre 8, 2022

PHILADELPHIA – The Department of Homeland Security, Federal Emergency Management Agency ([FEMA](#)) will evaluate a Biennial Radiological Emergency Preparedness Exercise for communities around the Calvert Cliffs Nuclear Power Plant. The exercise will occur during the week of September 12, 2022, to assess the ability of the State of Maryland to respond to an emergency at the nuclear facility.

“These drills are held every other year to evaluate government’s ability to protect public health and safety,” said MaryAnn Tierney, Regional Administrator for FEMA Region 3. “We will assess state and local government emergency response capabilities within the 10-mile Emergency Planning Zone within the State of Maryland.”

Within 90 days, FEMA will send its evaluation to the Nuclear Regulatory Commission ([NRC](#)) for use in licensing decisions. The final report will be available to the public approximately 120 days after the exercise.

FEMA will present preliminary findings of the exercise during a public meeting at 10:30 a.m. on September 16, 2022. The meeting will be conducted in a virtual format via Zoom. Planned speakers include representatives from FEMA and the NRC. Access to the public meeting is provided below:

Meeting ID: 161 617 9908

Passcode: 054827

At the public meeting, FEMA may request that questions or comments be submitted in writing for review and response. Written comments may also be

submitted after the meeting by emailing FEMAR3NewsDesk@fema.dhs.gov or by mail to:

MaryAnn Tierney

Regional Administrator

FEMA Region III

615 Chestnut Street, 6th Floor

Philadelphia, PA 19106

FEMA created the Radiological Emergency Preparedness (REP) Program to (1) ensure the health and safety of citizens living around commercial nuclear power plants would be adequately protected in the event of a nuclear power plant accident and (2) inform and educate the public about radiological emergency preparedness.

REP Program responsibilities cover only “offsite” activities, that is, state and local government emergency planning and preparedness activities that take place beyond the nuclear power plant boundaries. Onsite activities continue to be the responsibility of the NRC.

Additional information on FEMA’s REP Program is available online at [FEMA.gov/Radiological-Emergency-Preparedness-Program](https://www.fema.gov/Radiological-Emergency-Preparedness-Program).
