

FEMA Approves \$17.1M for Hurricane Ian Debris Removal in Charlotte County

Release Date: Février 29, 2024

FEMA has approved \$17,146,064 in grant funding to reimburse Charlotte County for debris removal expenses after Hurricane Ian.

The storm left extensive debris, resulting in a threat to public health and safety. Approximately 1,667,497 cubic yards of vegetative debris and 241,794 cubic yards of hurricane-generated debris were removed from roads and public property.

FEMA's Public Assistance program provides grants to state, local, territorial and tribal governments, and certain private nonprofit organizations, including houses of worship, so communities can quickly respond to and recover from major disasters or emergencies.

Applicants work with FEMA to develop projects and scopes of work. FEMA obligates funding for projects to the Florida Division of Emergency Management after final approval. Once a project is obligated, FDEM works closely with applicants to complete the grant process and begin making payments. FDEM has procedures in place designed to ensure grant funding is provided to local communities as quickly as possible.
