

FEMA Authorizes Funds to Fight Twenty-Five Mile Fire in Washington

Release Date: Out 18, 2021

BOTHELL, Wash. – The Federal Emergency Management Agency (FEMA) authorized the use of federal fund to help with firefighting costs for the Twenty-Five Mile Fire burning in Chelan County, Washington.

The state of Washington's request for a federal Fire Management Assistance Grant (FMAG) was approved by FEMA Region 10 Acting Administrator Vince Maykovich on Monday, August 17, 2021, at 10:39 p.m. PT. He determined that the Twenty-Five Mile Fire threatened to cause such destruction as would constitute a major disaster. This is the seventh FMAG declared in 2021 to help fight Washington wildfires.

At the time of the request, the fire threatened buildings in and around the west side of Lake Chelan and homes alongside South Lakeshore Road. The fire also threatened critical communications infrastructure.

FMAGs are provided through the President's Disaster Relief Fund and are made available by FEMA to assist in fighting fires that threaten to cause a major disaster. Eligible items can include expenses for field camps; equipment use, repair, and replacement; mobilization and demobilization activities; and tools, materials, and supplies. This authorization makes FEMA funding available to pay 75 percent of the state's eligible firefighting costs under an approved grant for managing, mitigating, and controlling designated fires. These grants do not provide assistance to individual home or business owners and do not cover other infrastructure damage caused by the fire.

In addition to the firefighting funds authorized under this FMAG, another \$778,778 will be available to Washington through the [Hazard Mitigation Grant Program \(HMGP\) Post Fire](#) for the mitigation of future wildfires and related hazards, such as flood after fire or erosion. Some eligible wildfire project types include defensible space measures, ignition-resistant construction, and hazardous fuels reduction. The [Disaster Recovery Reform Act of 2018](#) authorizes FEMA to provide [HMGP](#)
