

Proposed Weld County Flood Map Reflects Changes to Local Flood Risk, Insurance Rates

Release Date: 2? 19, 2021

DENVER – Weld County’s flood insurance rate map update is nearing completion. The new maps will provide Weld County with more accurate flood risk information that can help local officials and residents make informed decisions about reducing flood risks and purchasing flood insurance.

The mapping project is a joint effort between Weld County, Cities of Evans, Fort Lupton, and Greeley, Towns of Firestone, Frederick, Kersey, LaSalle, Mead, Milliken, Platteville, and Windsor, and the Colorado Water Conservation Board (CWCB). It is part of a nationwide effort led by the Federal Emergency Management Agency (FEMA) to increase local knowledge of flood risks and support actions to address and reduce those risks.

Before new flood insurance rate maps become effective, there is a 90-day appeal period during which local residents and business owners can provide additional data for consideration before the maps are final. This appeal period starts on February 23, 2021, February 24, 2021, or February 25, 2021 depending on the community.

Community officials and CWCB encourage residents and business owners to review the proposed flood insurance rate maps to learn about local flood risks, potential future flood insurance requirements, and any concerns or questions about the information provided.

You may submit an appeal package during the 90-day appeal period. The sole basis of the appeal must include the possession of knowledge or information indicating that the flood hazard determinations proposed by FEMA are scientifically and/or technically incorrect.
