

Florida Keys Continues Rebounding after Hurricane Irma

Release Date: June 4, 2018

Local Efforts Spur Recovery

ORLANDO, Fla. – Disaster recovery takes time but local initiatives in the Florida Keys after Hurricane Irma have accelerated the process.

The storm packed 130 mph winds when it made landfall on Cudjoe Key on Sept. 10, 2017 and continued through the Keys as a destructive, major hurricane. Officials and locals in the Keys saved lives, reduced disaster effects and waited little time to begin repairing and rebuilding.

Local economies resumed a short time after the storm and displaced survivors have continued making progress to return home. State and federal recovery programs have been essential in supporting local recovery efforts.

Infrastructure Help

The Key West Utility Board restored electricity to their 28,000 customers within days of the storm. FEMA recently obligated nearly **\$15.5 million** for labor and materials like transformers and electrical poles the utility board needed for this achievement.

The grants are part of more than **\$21 million** in federal disaster assistance to reimburse Hurricane Irma-related expenses in Monroe County and more is coming. Public Assistance applicants like local governments and nonprofits work with the state and FEMA to gather and submit documentation to move recovery forward.

FEMA provides grants to the state. Following the state's review process and upon receipt of appropriate documentation, the state distributes reimbursement funds.

Housing Help

Locals and nonprofits have contributed invaluable resources like time, building materials and temporary places to stay. FEMA has also assisted survivors by helping them with places to stay while they worked on recovery plans and providing grants to make home repairs.

At the state's request, the agency provided travel trailers, apartments and single family units to **243** Monroe County households who had been displaced by Hurricane Irma.

About **90** households—more than a third of those who received units—have made sufficient progress in recovery to move out and relocate to a more permanent home. This number increases weekly because of the dedication of Hurricane Irma survivors to move forward with repairs or rebuilding.

Monroe County survivors have also moved recovery forward with additional forms of housing help.

- The U.S. Small Business Administration has approved about **\$180 million** in low-interest disaster loans to repair and rebuild homes and businesses.
- Survivors there have used about **\$26 million** in FEMA grants—approximately **\$8,900 per eligible household**—to repair homes and make them habitable. They've also received about **\$25 million** in FEMA grants to help them pay for somewhere to stay if Hurricane Irma displaced them.

Helping people before, during, and after disasters.

Disaster recovery assistance is available without regard to race, color, religion, nationality, sex, age, disability, English proficiency or economic status. If you or someone you know has been discriminated against, call FEMA toll-free at 800-621-FEMA (3362). For TTY call 800-462-7585.

FEMA's temporary housing assistance and grants for public transportation expenses, medical and dental expenses, and funeral and burial expenses do not require individuals to apply for an SBA loan. However, applicants who receive SBA loan applications must submit them to SBA to be eligible for assistance that covers personal property, vehicle repair or replacement, and moving and storage expenses.
