

FEMA AUTHORIZES FUNDS TO FIGHT COLORADO'S EAST TROUBLESOME FIRE

Release Date: October 18, 2020

DENVER – This afternoon, FEMA authorized the use of federal funds to help with firefighting costs for the East Troublesome Fire burning in Grand County, Colorado near the City of Granby, and the Towns of Hot Sulphur Springs and Parshall.

FEMA Regional Administrator Lee dePalo approved the state's request for a federal Fire Management Assistance Grant (FMAG) after receiving the request and determining that the fire threatened such destruction as would constitute a major disaster.

At the time of the request, the East Troublesome Fire is threatening 135 homes. Mandatory evacuations are in place for approximately 100 people. Buildings, road, and bridge infrastructure also are being threatened, as well as the Colorado river watershed in the area. The fire started on October 12, 2020, and has burned in excess of 7,871 acres of federal and private land.

The authorization makes FEMA funding available to pay 75 percent of the state's eligible firefighting costs under an approved grant for managing, mitigating and controlling designated fires. These grants do not provide assistance to individual home or business owners and do not cover other infrastructure damage caused by the fire.

Fire Management Assistance Grants are provided through the President's Disaster Relief Fund and are made available by FEMA to assist in fighting fires that threaten to cause a major disaster. Eligible items can include expenses for field camps; equipment use, repair and replacement; mobilization and demobilization activities; and tools, materials and supplies.

With the FMAG authorization, additional funding is made available through the Hazard Mitigation Grant Program (HMGP) Post Fire for the mitigation of wildfire and related hazards, such as flood after fire or erosion. Some eligible wildfire project types include defensible space measures, ignition-resistant construction, and hazardous fuels reduction.
