

President Joseph R. Biden Approves Emergency Declaration for Louisiana

Release Date: February 19, 2021

WASHINGTON -- FEMA announced federal emergency aid has been made available to the state of Louisiana to supplement state and local response efforts in areas affected by a severe winter storm beginning Feb. 11, 2021 and continuing.

The president's action authorizes FEMA to coordinate all disaster relief efforts, which have the purpose of alleviating the hardship and suffering caused by the emergency on the local population, and to provide appropriate assistance for required emergency measures, authorized under Title V of the Robert T. Stafford Disaster Relief and Emergency Assistance Act, to save lives and to protect property and public health and safety and to lessen or avert the threat of a catastrophe in all 64 parishes.

Specifically, FEMA is authorized to identify, mobilize and provide at its discretion, equipment and resources necessary to alleviate the impacts of the emergency. Emergency protective measures for mass care and sheltering and direct federal assistance will be provided at 75% federal funding.

John E. Long has been named as the Federal Coordinating Officer for federal response operations for the affected area. Additional designations may be made later if requested by the state and warranted by the results of further assessments.
