

FEMA Authorizes Funds to Fight Baird Springs Fire in Washington

Release Date: July 11, 2023

BOTHELL, Wash. - The Federal Emergency Management Agency (FEMA) authorized the use of federal funds to help with firefighting costs for the Baird Springs Fire burning in Grant County, Washington.

The state of Washington's request for a federal [Fire Management Assistance Grant](#) (FMAG) was approved by FEMA Region 10 Administrator Willie G. Nunn on Tuesday, July 11, 2023, at 1:25 a.m. PT. He determined that the Baird Springs Fire threatened to cause such destruction as would constitute a major disaster. This is the third FMAG declared in 2023 to help fight Washington wildfires.

At the time of the state's request, the wildfire threatened homes in and around the communities of Trinidad and Crescent Bar. The fire also threatened Grant County Public Utility District and Bonneville Power Administration infrastructure, Burlington Northern Santa Fe rail lines, nearby campgrounds, a large boat launch, golf course, agriculture and tourism businesses, and fishing.

FMAGs are provided through the President's Disaster Relief Fund and are made available by FEMA to assist in fighting fires that threaten to cause a major disaster. Eligible items can include expenses for field camps; equipment use, repair, and replacement; mobilization and demobilization activities; and tools, materials, and supplies. This authorization makes FEMA funding available to pay 75 percent of the state's eligible firefighting costs under an approved grant for managing, mitigating, and controlling designated fires. These grants do not provide assistance to individual home or business owners and do not cover other infrastructure damage caused by the fire.

In addition to the firefighting funds authorized under this FMAG, another \$1,225,032 will be available to Washington through the [Hazard Mitigation Grant Program \(HMGP\) Post Fire](#) for the mitigation of future wildfires and related hazards, such as flood after fire or erosion. Some eligible wildfire project types

FEMA

include defensible space measures, ignition-resistant construction, and hazardous fuels reduction. The [Disaster Recovery Reform Act of 2018](#) authorizes FEMA to provide [HMGP Post-Fire](#) funds to eligible states and territories that receive Fire Management Assistance declarations and federally recognized tribes that have land burned within a designated area.
