

FEMA Awards Over \$64 Million to Massachusetts for COVID School Testing Costs

Release Date: January 31, 2024

The Federal Emergency Management Agency will be sending more than \$64 million to the Commonwealth of Massachusetts to reimburse it for the cost of contracting to provide testing services in public schools during the COVID-19 pandemic.

The \$64,144,440 Public Assistance grant will reimburse the Massachusetts Executive Office of Health and Human Services for the cost of contracting to provide testing at schools and in public buildings in surrounding communities between February 2021 and June 2022.

The contractor provided services which included operations and logistics of pooled testing, training, software, and technical assistance to school personnel.

The contractor also provided transportation for a total of 907,829 COVID-19 test specimens from approximately 2,400 public schools across the Commonwealth of Massachusetts to the laboratory for analysis.

“FEMA is pleased to be able to assist Massachusetts with these costs,” said FEMA Region 1 Regional Administrator Lori Ehrlich. “Reimbursing state, county, and municipal governments – as well as eligible non-profits and tribal entities – for the costs incurred during the COVID-19 pandemic is an important part of our nation’s ongoing recovery.”

FEMA’s Public Assistance program is an essential source of funding for states and communities recovering from a federally declared disaster or emergency.

So far, FEMA has provided more than \$2.7 billion in Public Assistance grants to Massachusetts to reimburse the commonwealth for pandemic-related expenses.
