Nonprofit Security Grant Program - National Security Supplemental Subapplicant Quick Start Guide

Release Date: Oct 28, 2024

Download a PDF Copy of this web page.

The U.S. Department of Homeland Security (DHS) is firmly committed to ensuring that its funding opportunities and application processes are clear and transparent, and that they do not create confusion or contain undue complexity. DHS has endeavored to fulfill this commitment here, and we plan to continue delivering on this commitment.

Nonprofit organizations should consider using this document as a reference when preparing applications for the Nonprofit Security Grant Program - National Security Supplemental (NSGP-NSS).

What is the NSGP-NSS?

The NSGP is a competitive grant program appropriated annually through DHS and administered by the Federal Emergency Management Agency (FEMA). It is intended to help nonprofit organizations increase their physical security posture against acts of terrorism or other extremist attacks. Eligible organizations are registered 501(c)(3) nonprofits or otherwise are organizations as described under 501(c)(3) of the Internal Revenue Code (IRC) and tax-exempt under section 501(a) of the IRC. This includes entities designated as “private” (e.g., private institutions of higher learning), as private colleges and universities can also be designated as 501(c)(3) entities. More information on tax-exempt organizations can be found at: https://www.irs.gov/charities-non-profits/charitable-organizations.

In the National Security Supplemental (*Israel Security Supplemental Appropriations Act, 2024),* DHS received an additional funding package to supplement NSGP funding. $180 million of the funding was added to the Fiscal Year (FY) 2024 NSGP Notice of Funding Opportunity (NOFO). The remaining

$210 million will be awarded as part of the NSGP-NSS.

Note: Publications and new program guidance are released periodically based on the current fiscal year. Please ensure that you have consulted the most current NSGP-NSS (NOFO) and Preparedness Grants Manual (PGM) thoroughly. Successful NSGP-NSS subrecipients must comply with all applicable requirements outlined in the NOFO and PGM. Any publications from prior fiscal years, or published before the NOFO, should be used as historical references only since program priorities and requirements can change every year.

How to Apply

Interested nonprofit organizations (subapplicants) must apply to the NSGP-NSS through their State Administrative Agency (SAA) (the applicant). New for NSGP-NSS, nonprofit organizations can apply ***individually*** or as a***group of subapplicants through a consortium application***. Each SAA has an established application submission process with a state-specific deadline to submit all required materials. ***The application submission deadline in FEMA's NSGP-NSS NOFO applies to the SAA only—NOT nonprofit organizations or consortium.*** You will need to contact your SAA point of contact on state-specific deadlines and supplemental application materials or requirements unique to your state or territory. The list of SAAs can be found at: https://www.fema.gov/grants/preparedness/state-administrative-agency-contacts. FEMA program support can be contacted by emailing fema-nsgp@fema.dhs.gov.

Nonprofit organizations must fully answer each question in all the sections of the Investment Justification(s) (IJ). In their IJ, nonprofit organizations should summarize the most critically important and impactful information. Each Investment Justification can request up to $200,000 per location/physical site/address. A nonprofit organization may submit application packages for up to three sites per NSGP-NSS-UA and NSGP-NSS-S funding stream, for a maximum of $600,000 per subapplicant organization per state or territory. The amount of funding requested (maximum of $600,000) and number of submissions per nonprofit organization (maximum of six applications, three under NSGP-NSS-S and three under NSGP-NSS-UA) may **not** exceed these limits per state or territory. In states with no Urban Area, no more than three applications per nonprofit organization are allowable.

A consortium of nonprofit organizations is also an eligible subapplicant. A consortium application is an opportunity for a nonprofit organization to act as a lead and apply for funding on behalf of itself and any number of other participating NSGP-NSS eligible nonprofit organizations. A consortium of nonprofit organizations must fill out one IJ (done by the consortium lead) and the Consortium Workbook, in addition to the Vulnerability Assessment(s) and Mission Statements. All nonprofit organizations in the consortium application must be compliant with the NSGP-NSS eligibility requirements. Nonprofit organizations may not apply both individually **and** as part of a consortium. The lead nonprofit organization and its partners must be the intended beneficiaries of the requested funding. The lead nonprofit organization shall not distribute grant-funded assets or provide grant-funded contractual services to non-compliant partner nonprofit organizations or other ineligible organizations. Nonprofit organizations must have a Unique Entity Identifier (UEI), which is obtained through SAM.gov. *Nonprofit organizations are not required to have a UEI issued* ***at the time of application*** but **MUST** have a valid UEI to receive a subaward from the SAA. Nonprofit organizations must register in SAM.gov to obtain the UEI **but are not required to maintain an active registration in SAM.gov.** Guidance on obtaining a UEI in SAM.gov can be found at GSA UEI Update and the Federal Service Desk Knowledge Base. It may take four weeks to obtain a UEI, and applicants should plan accordingly. **Obtaining a UEI does not cost anything; it is free of charge**.

Tip: NSGP-NSS has two funding streams: NSGP-NSS-State (NSGP-NSS-S) and NSGP-NSS-Urban Area (NSGP-NSS-UA). Subapplicants should identify and apply for the correct funding stream, which is based on the physical geographical location/address of the facility and whether it is within a high-risk urban area. A full list of eligible high-risk urban areas is in the NSGP-NSS NOFO. The list of urban areas can change annually, and the final list of eligible urban areas is included in the NOFO for the corresponding fiscal year. Contact your SAA for questions about the appropriate funding stream based on your organization's location. Note that traditional city limits do not always equate to the designated Urban Area's footprint. Applications submitted to the incorrect funding stream will not be considered.

For consortium applications, all nonprofit organizations within a consortium application must be eligible under the applied-for funding stream. For example, if a

consortium applies to the SAA to receive funding under NSGP-NSS-UA, all nonprofit organizations within the consortium must be located within the same FY 2024 UASI-designated high-risk urban areas.

Application Elements

The following materials, including any additional required or requested materials specific to the SAA, must be submitted to the SAA as part of a complete application package. A submission that is missing any required document(s) will be considered incomplete and will not be reviewed.

Mission Statement

A mission statement is a formal summary of the aims and values of an organization. The three components of a mission statement include the purpose, values, and goals of the organization. The provided statement should discuss the "who, what, and why" of your organization.

Tip: It is highly recommended that the mission statement is documented on official letterhead. This element helps inform and validate a nonprofit organization's categorical self-identification based on its ideology, beliefs, mission, function, or constituency served/supported.

Vulnerability Assessment

A vulnerability assessment is used to identify and validate physical security deficiencies of your organization/facility and is the foundation of an NSGP-NSS application. Vulnerability assessments can be provided in the form of a Cybersecurity and Infrastructure Security Agency (CISA) Self-Assessment (Facility Security Self-Assessment | CISA), a state or local law enforcement assessment, an outside contractor's assessment, or other valid method of assessment. The SAA may require a specific format/type of vulnerability assessment, so be sure to review the state-specific guidelines for their application requirements. CISA's Protective Security Advisors can assist in providing a vulnerability assessment as needed. For more information, review the CISA Central webpage.

The Vulnerably Assessment is different from a risk/threat assessment. A risk assessment involves looking *outside* of an organization to determine external threats that exist that could potentially lead to security issues, whereas a vulnerability assessment involves looking *inside* the organization for internal vulnerabilities and weaknesses. Projects/activities requested through the NSGP-NSS should align to mitigate items identified in the Vulnerability Assessment.

Vulnerability assessments are typically valid for as long as the items included in the assessment remain unaddressed/vulnerable. FEMA recommends updating these assessments anytime there is a significant renovation, change, or resolution to a vulnerability, *OR* every five years. FEMA does not currently impose specific requirements on vulnerability assessments. Be sure to verify with your SAA if there are any additional vulnerability assessment requirements.

Consortia have the option to submit either individual vulnerability/risk assessments for each nonprofit in the consortium or a shared vulnerability/risk assessment that reflects the collective risks faced by all consortium members as summarized in the IJ.

Tip: In preparation to describe how they intend to use NSGP-NSS grant funding, nonprofit organizations should think broadly and holistically in their approach to security measures designed to protect buildings and safeguard people. Some physical security control examples include locks, gates, and guards (e.g., contract security). Although these may be effective measures, there are many additional layers to physical security that can help protect the organization, including creating comprehensive physical security plans, conducting training and exercises (e.g., active shooter, evacuation), identifying countermeasures against intrusion (e.g., access controls), preventing physical security breaches (e.g., security enhanced doors/windows), and monitoring for physical security threats (e.g., cameras, surveillance). Descriptions of allowable costs and activities are located in the NOFO and the PGM. Unallowable costs will not be reimbursed.

Investment Justification (IJ)

The IJ is a fillable template, available through Grants.gov, that asks nonprofit organizations to describe the organization, risks/threats to the organization, and proposed projects/activities to mitigate security deficiencies (as identified in the

Vulnerability Assessment) utilizing NSGP-NSS funding. The IJ is published with the NOFO and is not available prior to the publication of the program materials. The IJ is subject to change each fiscal year, and prior years' templates will not be accepted. Only use the form for the current fiscal year or funding opportunity, as released on Grants.gov.

Consortium Workbook (for Consortium Applications ONLY)

The Consortium Workbook must expand upon the information provided in the consortium lead nonprofit organization's IJ. The Consortium Workbook must contain the number of nonprofit organizations within the consortium and the following information for each nonprofit organization within the consortium:

- Demographic information, including the name, address, nonprofit organization type, organization function, and organization affiliation;
- Programmatic information, including eligibility information, total funding requested per site, and a point of contact for each nonprofit organization; and,
- Additional narrative information, including how each nonprofit organization's projects address the objective of the consortium application as outlined in the lead nonprofit organization's IJ.

More information on Consortium Applications can be found in the NSGP-NSS NOFO and the NSGP-NSS Consortium Application Guide.

Supplemental Documents

Each state or territory is unique in how they manage and administer the NSGP-NSS. The SAA may require additional documents or specific application materials as part of the state or territory's internal NSGP-NSS application submission requirement. However, when preparing the IJ, nonprofit organizations must answer questions completely and cannot refer out to any supplemental documents as they are not submitted to nor reviewed by FEMA. The SAA only submits the IJ and in the case of consortium application, the Consortium Workbook to FEMA.

Tip: Contact your SAA for state-specific submission requirements.

Scoring and Funding Recommendations

Upon submission of your completed application, the SAA will review, score, and rank every complete application it has received from eligible subapplicants based on the criteria outlined in the NSGP-NSS NOFO. The results of the SAA scoring process will be forwarded to FEMA. FEMA's federal review focuses on checks to ensure SAAs have followed the applicable guidance in their prioritization of projects, validating recipient eligibility (e.g., that a recipient meets all the criteria for the program), validating allowability of the proposed project(s), and checking for any derogatory information on the organization applying. Following the federal review and SAA scoring, subapplicants are recommended for funding. The final list of recommended subapplicants to be funded is provided to the Secretary of Homeland Security for final approval.

Additional Points

Additional "bonus" points are added to the final scores of subapplicants based on their service to disadvantaged communities. To advance considerations of equity in awarding NSGP-NSS grant funding, FEMA will add 10 points to applications from organizations in communities identified as "disadvantaged" by CEJST. FEMA will apply the Council on Economic Quality's Climate and Economic Justice Screening Tool (CEJST) to each subapplicant using the address of their physical location to identify whether a community is considered "disadvantaged" per the tool's methodology (CEJST Methodology).

Multipliers are also applied as part of the NSGP-NSS scoring process. To calculate an applicant's final score, the subapplicant's SAA score will be multiplied:

- By a factor of four for nonprofit organizations facing heightened threat resulting from the Israel-Hamas war***(subapplicants must draw a clear connection between the heightened threat they face and the Israel-Hamas war in their project narratives to qualify for this multiplier)***;
  - A Nonprofit organization that can demonstrate a clear threat of violence based on its actual or perceived views, positions, or advocacy related to aspects of the Israel-Hamas war.

Any nonprofit organization that can demonstrate it faces heightened threat resulting from the Israel-Hamas war is eligible for this multiplier, regardless of the organization's purpose, mission, viewpoint, membership, or affiliations. Below are a few illustrative examples of scenarios that may qualify a nonprofit organization for this multiplier.:

- A private, secular university that faces threats from violent extremists that are associated with increased protest activity relating to the Israel-Hamas war, resulting in the need for additional public safety assets.
- An Arab organization that has been targeted, due to its ethnic affiliation, by violent extremists through online hate referencing the Israel-Hamas war.
- A Jewish day school that was vandalized by violent extremists seeking to commit attacks based on the Israel-Hamas war.
- An LGBTQI+ organization that faced violent protests during Pride events related to aspects of the Israel-Hamas war.
- A mosque that has received threats of violence based on the worldwide unrest because of the ongoing Israel-Hamas war.
- A Sikh organization where a violent extremist attempted to access a holiday celebration due to the organization's perceived position on the Israel-Hamas war.

These cases are merely illustrative, not exhaustive, of the types of nonprofits and conditions under which this multiplier would apply. For subapplicants who claim this multiplier, they must draw a clear connection between the heightened threat they face due to the ongoing conflict in the middle east, though descriptive examples of real-word situations to include, but not limited to, supporting documents such as insurance claims, threat reporting, police reports, and online threats. ***Note: This multiplier is specific to the NSGP-NSS funding opportunity only.***

- By a factor of three for ideology-based/spiritual/religious entities (e.g., houses of worship, ideology-based/spiritual/religious educational institutions, ideology-based/spiritual/religious medical facilities);
- By a factor of two for secular educational and medical institutions; and
- By a factor of one for all other nonprofit organizations.

Bonus points will be applied for consortium applications based on the qualifying characteristics of the lead nonprofit organization.

Consortium Award Management

If successful, the lead consortium member will accept the subaward on behalf of the consortium, implement the approved projects/contracts for all consortium member sites, and manage the subaward throughout the period of performance, to include ensuring that all terms and conditions of the subaward are met.

In the case of awards over $250,000, the consortium must comply with the Build America, Buy America Act (BABAA). For more information, see the NSGP-NSS NOFO.

Investment Justification Checklist

Nonprofit organizations must fully answer each question in all the sections of the Investment Justification (IJ) for the form to be considered complete. For consortium applications, **only the lead nonprofit organization must fill out the IJ.** In their IJ, nonprofit organizations should summarize the most critically important and impactful information. The NSGP-NSS IJ is the only document submitted to FEMA by the SAA (and in the case of consortium applications, the Consortium Workbook is also submitted) and should be crafted using the identified threats/risks to your organization, the results of the Vulnerability Assessment of a physical location/structure/building, and details of the requested projects/activities to mitigate or remediate those vulnerabilities with associated estimated costs. ***Nonprofit organizations should describe their current threat/risk. While historic risk may be included for context, the IJ should focus on current threats and risks.***

The IJ Checklist is divided by Section and includes the specific required contents of a complete NSGP-NSS IJ. The “Overall Verification” checklist provides general, overall checks for nonprofit organizations to use to verify their work prior to IJ submission.

Reminder: Individual nonprofit applicants may submit up to six application packages for each unique physical location/address/site a nonprofit organization might have. Each IJ can request up to $200200,000 per location, with an upper

limit of $600600,000 per nonprofit organization across six unique physical locations/addresses, with a maximum of three submissions to each funding stream (NSGP-NSS-UA and NSGP-NSS-S). Consortium applications have an upper limit of $1,000,000 per application. The $200,000 per site maximum still applies for each individual nonprofit organization within the consortium. The amount of funding requested, and number of submissions, may not exceed these limits.

Section I – Applicant Information

- Legal Name of the Organization/Physical Address of the Facility/County
- Consortium Application Identification
- Owning vs. Leasing/Renting and Permission to Make Enhancements
- Application is Part of vs. not Part of a Consortium
- Active Operation out of the Listed Location (i.e., fully operations at the time of application)
- Other Organizations in the Facility
- Mission Statement Summary
- Organization Type
- Organization Function
- Organization's Affiliation
  - The nonprofit organization must apply on their own behalf on the IJ, NOT on behalf of other entities, including government or for-profit entities.
- 501(c)(3) Tax-Exempt Designation
- Unique Entity Identifier (UEI) obtained via SAM.gov
  - Individual nonprofit organizations applying and lead organizations for consortia are not required to have a UEI at the time of application but must have a valid UEI in order to receive funds.
  - Nonprofit organizations within consortia that are not the lead organization are not required by federal mandate to have a valid UEI at any point in the award lifecycle, unless otherwise mandated by their SAA.
- Funding Stream
  - Designated high-risk urban area (if applicable)
- Federal Funding Request (total estimated cost of projects/activities)
  - The total amount auto will populate in the IJ form.

Section II – Background

- Describe the symbolic value of your organization's site as a highly recognized national or historical institution, or significant institution within the community that renders the site a possible target of terrorist or other extremist attack.
- Describe any current/active role in responding to or recovering from terrorist/other extremist, human-caused, and/or natural disasters, specifically highlighting the efforts that demonstrate integration of nonprofit preparedness with broader state and local preparedness efforts.

Section III – Risk

- Heightened Threat: Confirm whether the nonprofit organization faces a heightened threat resulting from the Israel-Hamas war.
- Threat: Describe the identification and substantiation of specific threats, incidents, or attacks against the nonprofit organization or a closely related organization, network, or cell (examples include police report, insurance claim, internet threats, etc.).
  - Threats/risks have a terrorism/other extremism nexus.
- Vulnerability: Describe your organization's susceptibility to destruction, incapacitation, or exploitation by a terrorist or other extremist attack.
  - Summary findings from the Vulnerability Assessment included in the IJ are accurate and based on the Vulnerability Assessment submitted to the SAA.
- Consequence: Describe potential negative effects/impacts on your organization's assets, systems, and/or function if disrupted, damaged, or destroyed due to a terrorist or other extremist attack.

Section IV – Facility Hardening

- Describe how the proposed projects/activities will harden (make safer/more secure) the facility and/or mitigate the identified risk(s) and/or vulnerabilities based on the Vulnerability Assessment.
  - Threats/risks are linked to existing physical vulnerabilities.
  - Requested funding logically follows the information provided from the Vulnerability Assessment.
- Describe how the proposed target hardening focuses on the prevention of and/or protection against the risk/threat of a terrorist or other extremist attack.
- Confirm that the proposed projects are allowable in accordance with the priorities of the NSGP-NSS, as stated in the NSGP-NSS NOFO.

- Confirm that the proposed projects are feasible (meaning there is a reasonable expectation based on predicable planning assumptions to complete all tasks, projects and/or activities within the subaward period of performance) and proposed milestones under the NSGP-NSS.
- Application does not present any actual or perceived conflict between grant writers/consultants and contractors/vendors sourced for projects.
- Contract security/any hiring outside of the nonprofit organization is explicitly written to not be sole sourced. Nonprofit organizations must always abide by federal and state procurement guidance.

Section V – Milestones

- Describe any key activities that will lead to milestones in the program/project and grants management over the course of the NSGP-NSS grant award period of performance.
  - NOTE: Anything involving modifications to a building or site will likely require Environmental Planning and Historic Preservation (EHP) review. In that case, EHP review should be one of the first milestones. For more information about the NSGP-NSS's EHP process, see FEMA Policy: Grant Programs Directorate Environmental Planning and Historic Preservation.

Section VI – Project Management

Describe the proposed management team's roles, responsibilities, and governance structure to support the implementation of the projects/activities.

- Assess the project management plan/approach.

Section VII – Impact

- Describe the outcome and outputs of the proposed projects/activities that will indicate that the investment was successful.

Funding History

- Include past funding amounts, past projects, and fiscal year of previous subawards under the NSGP.

Overall Verification: Prior to Submission

- Application package is complete. FEMA will not review incomplete application packages.
- All proposed projects/activities are allowable per the NSGP-NSS NOFO.
- IJ's content and project goals are logical and reasonable.
- FEMA-provided IJ form for the current funding opportunity is submitted.
- Nonprofit organization has reviewed the grant writer's work (if applicable).
- IJ is signed by the nonprofit organization's point of contact, *not the grant writer* (if applicable).
- IJ is unique to the nonprofit organization, physical location/site/address, and vulnerabilities listed.
- IJ requests $200,000 or less **or** $1,000,000 or less for consortium IJs.

Definitions

- Vulnerability Assessment: The Vulnerability Assessment is a documented review of your facility that identifies gaps in security. Addressing gaps as they are identified in the Vulnerability Assessment keeps a facility and its occupants, visitors, or members safe. This document is part of the foundation of an NSGP-NSS application.
- Disadvantaged Communities: The NSGP-NSS uses the term "disadvantaged communities" to apply to any community identified as "disadvantaged" by CEJST. CEJST uses datasets as indicators of burdens, which are organized into categories. A community is highlighted as disadvantaged on the CEJST map if it is in a census tract that is (1) at or above the threshold for one or more environmental, climate, or other burdens; and (2) at or above the threshold for an associated socioeconomic burden.
- Subapplicant/Subrecipient: Individual nonprofit organizations and consortium of nonprofit organizations are considered the subapplicants to the NSGP-NSS, or the subrecipients of the NSGP-NSS. The SAA is the primary applicant and recipient. Nonprofit organizations may individually submit an application or apply as part of a group of nonprofits in a consortium application to their SAA, which will then submit it to FEMA for consideration. The award itself will be made directly to the SAA. The SAA will then manage the grant and be the main point of contact for the nonprofit organizations and consortium for everything related to their grant award.

- Period of Performance: The period of performance is the length of time that recipients and subrecipients have to implement their project(s), accomplish all goals, and expend all grant funding. The period of performance under the NSGP-NSS is 36 months for the SAAs; however, a period of performance shorter than 36 months is typically given to subrecipients. There may be situational extensions to the period of performance based on undue hardships, but recipients and subrecipients should not assume any extensions will be granted and plan for full project completion within the designated period of performance. **All costs must be incurred, and all services or goods must be completed or delivered, within the period of performance**. Unless the subrecipient and SAA have requested and received approval from FEMA for pre-award costs, any expenditures made prior to official notification of award from the SAA and before the start of the subrecipient's period of performance will be considered unallowable.
- High-risk Urban Area: High-risk urban areas are the metropolitan locations designated in FEMA's Urban Area Security Initiative (UASI) program each year. The UASI list is available in the NSGP-NSS NOFO. Nonprofit organizations with physical locations in one of these identified high-risk urban areas are eligible under the NSGP-NSS-Urban Area (UA) program, while all other nonprofit organizations are eligible under the NSGP-NSS-State (S) program. Contact your SAA to confirm whether your organization is located within a designated high-risk urban area for the purposes of the NSGP-NSS-UA program; city limits do not always equate to the designated UASI footprint. If a nonprofit organization does not apply for the correct funding stream based on location, the application will be automatically eliminated.
- State Administrative Agency (SAA): SAAs are the designated state or territory offices that manage the NSGP-NSS awards. These offices are the primary applicants to FEMA and recipients from FEMA of NSGP-NSS funds. The SAA will make NSGP-NSS subawards to subrecipients (i.e., nonprofit organizations).
- Risk: Potential for an adverse outcome assessed as a function of hazard/threats, assets and their vulnerabilities, and consequence. In the context of NSGP-NSS applications, nonprofit organizations should describe their current threat/risk of terroristic or other extremist attack and how those identified vulnerabilities (in the Vulnerability Assessment) could potentially be exploited.

- Threat: Indication of potential harm to life, information, operations, the environment and/or property; may be a natural or human-created occurrence and considers capabilities, intentions, and attack methods of adversaries used to exploit circumstances or occurrences with the intent to cause harm.
- Vulnerability: Physical feature or operational attribute that renders an entity open to exploitation or susceptible to a given hazard; includes characteristic of design, location, security posture, operation, or any combination thereof, that renders an asset, system, network, or entity susceptible to disruption, destruction, or exploitation.
- Consequence: Effect of an event, incident, or occurrence; commonly measured in four ways: human, economic, mission, and psychological, but may also include other factors such as impact on the environment.
- Terrorism: Any activity that:

1. Involves an act that: A) is dangerous to human life or potentially destructive of critical infrastructure or key resources; and B) is a violation of the criminal laws of the United States or of any State or other subdivision of the United States; and
2. Appears to be intended to: A) intimidate or coerce a civilian population; B) influence a policy of a government by intimidation or coercion; or C) affect the conduct of a government by mass destruction, assassination, or kidnapping.

Additional definitions can be found in the DHS Lexicon Terms and Definitions.

Abbreviations

Abbreviation	Definition
CEJST	Council on Economic Quality's Climate and Economic Justice Screening Tool
CISA	Cybersecurity and Infrastructure Security Agency
DHS	U.S. Department of Homeland Security

Abbreviation	Definition
EHP	Environmental Planning and Historic Preservation
FEMA	Federal Emergency Management Agency
IJ	Investment Justification
IRC	Internal Revenue Code
NOFO	Notice of Funding Opportunity
NSGP-NSS-S	Nonprofit Security Grant Program – National Security Supplemental - State
NSGP-NSS-UA	Nonprofit Security Grant Program – National Security Supplemental - Urban Area
PGM	Preparedness Grants Manual
SAA	State Administrative Agency
UASI	Urban Area Security Initiative
UEI	Unique Entity Identifier

Resources

This section contains a list of resources that NSGP-NSS applicants may find useful in the development of their Investment Justifications. Potential applicants can use the links listed below to access information and resources that can assist in the NSGP-NSS application process and project implementation. Resources referring to prior fiscal years are provided for historical reference only.
